

## **Signs of Safety Partner Training**

There are 3 different types of Signs of Safety Training available for partner agencies.

### **Half Day Basic Introduction to Signs of Safety**

An introduction to the Signs of Safety model for partners and agencies who are working directly or indirectly with children and families within Tameside. The half day training will provide an overview of the model to enable partners to understand the principles, tools and practice elements of the model and how they can use the model within their own practice. This training will be useful for a broad range of partners but in particular those who are involved in CAF's, CIN, CP and LAC cases.

### **One Day Training**

A more in-depth introduction to the Signs of Safety Model with the opportunity to practice using the framework and tools. This training will be useful for a broad range of partners but in particular those who are involved in CAF's, CIN, CP and LAC cases.

### **Two day Signs of Safety Training**

The standard training module for practitioners involved in completing assessments and wanting to use the Signs of Safety approach is delivered via a 2-day training course. It is designed for all practitioners, supervisors and managers working with children where there are concerns about their safety and well-being.

This course will provide:

- An introduction to the Signs of Safety approach
- Opportunities for participants to practice using the approach on their own cases
- A demonstration of the model using a local case - via live case mapping with trainer using appreciative enquiries, solution focused questioning.
- An introduction to Safety Planning
- An introduction to tools which support direct work with children

- The content will be the same for both practitioners and managers but will provide slightly different emphasis/feedback to participants according to their role.

On completion of this, participants are expected to use the model in practice and share their learning and knowledge with their colleagues.
